

Statistical Outlier Wanted (link to ad on site)

Deadline for applications: 12:00 noon on 30th April 2018 for interviews on 14th May

Do you stand out from the norm? We're looking for someone who's fluent in the language of numbers, fascinated by wellbeing, and able to share their insights effortlessly in pictures and words.

Happy City is a charity that puts the wellbeing of current and future generations centre stage. We produce measurement tools which use the proofs of modern science to help people understand and act on what really matters - the things that truly drive prosperous lives and a prosperous economy.

We have space for a multi-talented **Senior Data Analyst** to star in our all-star team. Building on the learning from our [Thriving Places Index](#) and [Happiness Pulse](#), you'll help us refine our modelling, data collection and calculations as we seek further breakthroughs in wellbeing measurement and understanding. By matching our reputation for integrity, reliability, knowledge and technical skill, you'll cement your own. Together, we'll stay ahead of the curve, leading the learning for a happier, healthier world.

We're able to offer a full time fixed term 24 month contract at 37.5 hours per week. The salary is £30,000 with benefits. The job starts as soon as possible after interviews.

If you're itching to help us re-design the ways and means by which we measure our success, take a look at the full job description here: [Senior Data Analyst \(wellbeing measurement\)](#)

Happy City is committed to equality, diversity and inclusion. To apply, please write to gareth@happycity.org.uk Send us your CV with a brief covering letter describing your reasons for applying.

Deadline for applications: 12:00 noon, on 30th April 2018

Happy City will stand tall in 2018 - will you be exceptional with us?
